This month's topic:

MOJAVE

A guided tour of the new features in the latest Mac operating system
to be presented by **Roger Owens**

How might one take an evening tour of Mojave with no map, no compass, no canteen, and nary a sandstorm in sight? If one is speaking of the brand-new version of macOS, Mojave, the best way would be to attend our November meeting. Our tour guide, Roger, will lead us through Mojave's impressive features and functions, including Desktop Stacks to declutter desktop icons, Gallery View to quickly scroll through big previews of your files, Continuity Camera to take a photo with your iPhone and have it instantly appear in a document or in Finder, group FaceTime calls, a completely overhauled Mac App Store, a dynamic Mojave wallpaper that changes throughout the day, and a beautiful new Dark Mode. Please join us on Tuesday for the full tour; we promise there will be plenty to see.

Also,

BACK TO MAC BASICS

In this segment, we focus on more fundamental skills, to make life a little easier for those who are trying to learn how to use their Macs. This month:

AIRPRINT

The easiest way to set up a wireless printer for Mac or iOS
to be presented by **Rob Ellis**

There are many wireless printers, and several methods of setting up wireless printers, but the easiest method by far is AirPrint. What is not so easy is finding clear, simple directions on how to do it. On Tuesday, Rob will show what many printer manuals fail to spell out: how to set up an AirPrint printer quickly, without a trip to the bathroom for the aspirin bottle.

What is better than a trip to Mojave? A trip to Mojave that does not involve withstanding intense heat, intense cold, or challenges to the health of your lungs. Please join us for a trip to the other, more human-friendly Mojave. And please feel free to bring a friend. See you there!
